BY AUTHORITY

The Board of License Commissioners for the City and County of Honolulu will hold a meeting at the Assembly Hall, County Building on Wednesday, December 5, 1913, at 3:30 p. m. to consider the application of Taisuke W. Oda for a second class Restaurant License to sell intoxicating liquors at Kalia, Waikiki, on Kalakaua Ave., Honolulu, under the provisions of Act 119, Session Laws of 1907.

All protests of objections against the issuance of a License under said application should be filed with the Secretary of the Board not later than the time set for said hearing.

CARLOS A. LONG,
Secretary Board of License Commissioners.

A ladies' valise with name on it, owner prove property and paying expenses. Call at this office. 5699-31.

RAPID WORK DONE ON SAN CARLOS' NEW SUGAR MILL

Rapid progress is being made on the erection of the big modern sugar mill at San Carlos, Negros, Philippine Islands, a project in which much local capital is invested.

Alfred D. Cooper, promoter of the enterprise, said this morning that the mill is nearly finished. He has a set of photographs showing the work in various stages. When the San Carlos Milling Company began its development work at the port, including the construction of a long wharf to deep-water, the government became interested and has now made San Carlos a first-class port, as is Manila, the order being issued last July.

The Hilo Enterprise of September 25 says of the construction work: "The erection of the new modern mill at San Carlos, Negros, is fast nearing completion. An army of workers is busy on both railroad and mill, and with the arrival on the S. S. Zafiro on Sept. 3d of the last piece of machinery, there is no doubt that everything will be in readiness to receive the cane now growing so luxuriantly in the San Carlos valley."

"The San Carlos Central and the planters who supported it, met with many obstacles, and negotiations between the planters and the Honolulu capitalists lasted over several years before a satisfactory agreement could be arrived at. This was only natural as neither party knew the other. The planters had to guard against being exploited by some unscrupulous promoters and the capitalists had to guard against placing an investment in a country with which they were not familiar without first securing protection for the investment."

"One not acquainted with the modern process of sugar manufacture can not realize the enormous amount of money required to build and equip a first class central mill. If all the cane land in the San Carlos valley was sold for 400 pesos per hectare, the amount expended would not equal the amount expended by the Central company in completing their present plant."

"A central mill must therefore be a mutual investment to be a success. No legitimate company or individual will even consider investing 2,000,000 pesos in a community without ample protection from the contracting planters, and no planter should even think of contracting his land to a central company without first definitely learning that the central company is a legitimate company and that it is prepared to erect and operate a first class mill."

"The mill will be equipped with nine 34"x78" rollers superseded by revolving knives, and two crusher rolls, all driven with cast-steel gearing by a 550 horse-power engine. The boiler will be five in number and can develop 1375 horse-power. They are supplied with bagasse fuel by means of machinery direct from the mill. The clarifying department is equipped with Howe scales for weighing the juice, liming tanks, settling tanks, mud presses and filters. The clear juice is boiled under vacuum in a quadruple effect with copper calandrias and then delivered to the two vacuum pans where it is boiled by steam until a 96 degree sugar is obtained. There are 1340 centrifugal machines for extracting the molasses driven by a 125 horse-power Corliss engine, and another similar engine for driving the vacuum pump."

"The buildings are entirely of steel height of 80 feet. The sugar warehouse is 66x100 feet, with a carrier running the entire length. And there is a molasses storage tank holding 108,000 gallons. The actual mill has 18 miles of railway with three Baldwin locomotives and 225 cars of five tons cane capacity. The cane is handled entirely by machinery from the time it is cut in the fields until it is loaded into the steamers at the end of the 1800-foot dock."

"The millsite is dotted with large, well ventilated and sanitary cottages for the workmen and their families. The officers' quarters consist of 12 separate houses and one clubhouse of 15 rooms. Each house has running artesian water supplied from an 80-foot tower, sanitary sewerage and abundance of shade from the cocoanut trees. The mill will grind this coming season some 110,000 tons of cane."

F. A. CARL, identified with the customs service of China, in an executive capacity, is making a trip to the mainland as a passenger in the Manchuria.

No habitual traveler around and across this mundane sphere uses actual money in large amounts. He knows better. When you travel use travelers' cheques—which are safer and better. You can get them at the Bank of Hawaii.

HAWAII'S TRADE

EIGHT MONTHS

For the eight months ending August, shipments of domestic merchandise from the United States to Hawaii amounted in value to \$20,538,652. This was a gain of \$2,721,450 over the corresponding period of 1912 and \$6,273,891 over that of 1911.

As compared with other non-contiguous territories, this twenty and one-half millions odd is exceeded only by Porto Rico's purchases of \$21,249,524. Next below Hawaii come the Philippine Islands with \$17,465,521, Alaska being last with \$15,854,121.

Shipments to Hawaii for the period mentioned are thus classified: Foodstuffs in crude condition and food animals, \$1,116,952; foodstuffs partly or wholly manufactured, \$3,199,993; crude materials for use in manufacturing, \$527,204; manufactures for further use in manufacturing, \$2,423,406; manufactures ready for consumption, \$13,078,066; miscellaneous, \$188,031.

Hawaii is also second in shipment of products to the mainland, with \$32,092,150, against \$34,184,599 from Porto Rico, \$10,471,530 from the Philippine Islands and \$5,491,302 from Alaska.

Shipments from Hawaii are classified thus: Foodstuffs in crude condition and food animals, \$449,158; foodstuffs partly or wholly manufactured, \$3,347,030; crude materials for use in manufacturing, \$197,149; manufactures for further use in manufacturing, \$14,484; manufactures ready for consumption, \$64,330.

Hawaii's shipments as above stated are \$3,993,370 less than in the corresponding period of 1912 and \$2,402,876 less than in that of 1911. Sugar shipments amounting to \$29,352,425 for this year's period were nearly 10 million dollars below the value of those of last year in the same time.

Fruits and nuts to the value of \$1,873,326 indicate a gain of \$670,659, canned pineapples accounting for \$657,074 of this increased value.

A correspondent of the London Times strongly opposes the pessimistic view of the rubber outlook. He regards as "absolutely fatuous" the view that "unless artificial remedies are provided, the plantation industry is in danger of ruin." The contention that the increase in supplies from the Mid-East plantations has already exceeded the increase in annual consumption, the Times writer thinks, is "by no means proved. The visible stock is not increasing, although consumption was undoubtedly checked in the early part of this year by various temporary causes." What he hopes to show is that the rubber plantation industry has now established a quite unassailable position. He regards two shillings as the minimum price for years to come, which, with respect to conditions in Southern India, Ceylon and Sumatra, would mean a net divisible profit of 20 pounds an acre with a fair margin. With the value of the land estimated even at 100 pounds, though some snarers are on the basis of 25 pounds an acre, the writer considers the shares reasonably secure as a 20 per cent investment whatever may happen.

"It is only the lowest grade of properties which will altogether succumb to 2s. rubber," he says in concluding, "and the existence of this class was never at any time otherwise than injurious to the genuine interests of the plantation industry."

MEETING POSTPONED.

On account of the absence of one of the principal speakers from the city, also a number of counter attractions, the meeting of the Central Improvement Committee will be postponed from Friday evening of this week until a date to be announced later.

NEW TODAY

GIVE your wife a Westinghouse Electric Iron. It will save her an hour or two every ironing day, because it is always at the right temperature. No changing irons—no waiting—no fire to keep up. If she doesn't do the ironing herself, she needs it for pressing. It's always ready for immediate use in any room. Convenient when traveling.

The Westinghouse Electric Iron

is an iron that you can depend upon absolutely. Its heating element is made to last as long as the iron and gives the most useful heat for the current consumed. One iron is all that is required.
